SKILLS

Languages and DataBases:	Python, SQL, T-SQL, Azure, Pandas
Visualization Tools:	Tableau, Power BI, DAX, Power Query
Other Skills:	Advance Excel, Business Analysis, Data Analysis

EXPERIENCE

Data Analyst — Mar 2022 - Present
IT Convergence — *Noida, India*

- Architected ETL pipelines using Azure Data Factory to extract data from diverse platforms like Jira User Stories, App Store, Google Play, and tabular/unstructured formats (JSON, CSV).
- Developed comprehensive and visually appealing reports and interactive dashboards using Power BI Desktop and published them securely to Power BI service.
- Collaborated with the Human Resources and Recruitment team to train them and create reports and insights more accessible with Power BI dashboards.
- Normalized and enriched data using SQL, Pandas, and MS Excel, employing statistical techniques like regression, AB testing, and hypothesis testing to gain actionable insights
- Pioneered innovative solutions, such as the Proof-of-Concept for automated data integrity testing of Power BI reports, and partnered with stakeholders across departments to understand business needs and translate them into data-driven solutions

Role Name — Jan 2017 - Jan 2019
Company Name — *San Francisco, CA*

- Utilized SQL, Excel, Power BI, and Python, including libraries like Pandas to work with large datasets and perform data cleaning.
- Applied statistical techniques, enhancing decision-making with a 15robustness, and developed and deployed the interactive dashboard into Power BI services.

PERSONAL PROJECTS

Amazon Sales: Interactive Power BI Dashboard. Developed an interactive PowerBI dashboard for the Amazon Sales data, focused on aiding strategic decision-making and illustrating complex data challenges. [(Try it here)](#)

CERTIFICATES

- Google's [Data Analytics and Statistics](#)
